

Atal Tinkering Lab (ATL)
CERTIFICATE OF PROJECT COMPLETION
AND ENGINEERING ACHIEVEMENT

This is to certify that
MR. LEANDRO P
a student of Aristo Public School, Cuddalore,
has successfully completed the engineering project

“LOW-COST RESCUE DRONE”

The project was undertaken through the Atal Tinkering Lab (ATL) during the period July 2024 to January 2025.

Mr. Leandro P served as the Project Lead and was actively involved in the development of the working prototype. His responsibilities included electronic hardware integration, circuit wiring, assembly, flight-controller configuration, sensor integration, calibration, testing, troubleshooting, and project documentation.

The project progressed through multiple stages of experimentation and improvement, including work with Arduino/ESP32, the MPU6050 sensor, and subsequently a KK2.1.5 flight controller. The completed prototype incorporated brushless motors, electronic speed controllers, a Li-Po battery, radio-control equipment, and a quadcopter frame.

The completed prototype successfully achieved controlled flight and was demonstrated at the school. Through this project, Leandro demonstrated practical engineering skills, problem-solving through experimentation, persistence in troubleshooting, and the ability to integrate electronic and mechanical components into a functional prototype.

This certificate is issued in recognition of his successful completion of the project and his technical contribution as Project Lead.

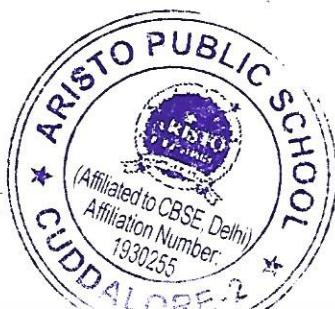

Project Period	July 2024 – January 2025
Project	Low-Cost Rescue Drone
Role	Project Lead
Institution / Laboratory	Aristo Public School, Cuddalore / Atal Tinkering Lab.(ATL)

Certificate No.: _____

Date of Issue: 05.10.2026

Place: Cuddalore

ATL Coordinator / Project Mentor
5/10/2026

MATHURA PRASAD PANDEY
